ERROR :: INVALID API KEY ::   **phpToPDF.com**

Please put a valid API key in the phpToPDF.php include file and make sure you are calling the proper phpToPDF.php file in your code.

Your API key is listed on your dashboard: http://phptopdf.com/dashboard

Running Examples? If you are seeing this message while running the examples from the API, make sure you have your API key in /examples/phpToPDF.php and not just /phpToPDF.php
